HEALTHCARE EMERGENCY PREPAREDNESS

EQUIPMENT & SUPPLIES CATALOG

Ready now for what's next.™

DQE® - EXPERIENCE YOU CAN DEPEND ON OVER 25 YEARS IN HEALTHCARE EMERGENCY PREPAREDNESS

Thank you for taking time to review our catalog. With each new addition, we reinforce our commitment to healthcare emergency preparedness by adding practical and relevant products that support your organization's goals.

Since 1990, DQE has been leading the way with its practical approach to emergency preparedness, working to save hospitals time and money in their effort toward becoming "disaster resilient". Our in-house experts and staff are some of the best in the industry, who bring their experience, passion and knowledge in various fields of health & safety, emergency management & response, and product & educational services design. This unique experience brings with it a unique capability to serve the various facets of healthcare preparedness. We live and breathe emergency preparedness through our vast product and supply selection, providing training for your staff, and assisting you in building compliant policies and procedures.

We hope to partner with you in all the ways you need in sustaining a manageable emergency preparedness program at your facility. We appreciate the role you play in serving your community's safety and health, and because of this, we remain tireless in our desire to help you to become *Ready Now for What's Next™*

Yours Truly,

The DQE Team

ORDERING WITH DQE IS EASY!

Order online at www.dqeready.com where you can upload a purchase order or purchase by credit card (we accept VISA, Mastercard, Discover, and American Express).
Submit a purchase order via fax at 317-295-9822 or email at orders@dqeready.com.
Give our customer service representatives a call at 800-355-4628.

SETTING UP A DECONTAMINATION AREA

View the products that make up this decon area at
www.dqeready.com/Decontamination-Setup

WASTE MANAGEMENT

To have a safe and orderly decon area, all waste must be properly contained until it can be evaluated and disposed of in accordance with a variety of local and federal guidelines. Receptacles for both solid and liquid waste must be provided throughout the decon corridor. A flexible water bladder makes an excellent water storage vessel as it can accommodate greater volumes than traditional barrels and requires less storage space (considering their volume). *See page 11.*

DECON CORRIDOR

The placement of equipment within the decon corridor is critical. There are many aspects that must be considered. Proximity to utilities, lighting, and accessibility for victims are important considerations, but the most important is organizing the decon area with responder safety as your number one priority. A ground tarp or colored zone tarp is an easy way to visually identify the boundaries of the decon corridor as well as the resulting quadrants: warm zone, cold zone, clean side, and dirty side. *See page 14.*

PERSONAL PROTECTIVE EQUIPMENT

Personal protective equipment is the most important component of your decon arsenal. If your responders are not provided with, and trained in, the use of appropriate PPE, you may be forced to rescue your rescuers. DQE offers several options for PPE and respirators. *See page 18.*

CLOTHING REMOVAL

By providing victims with personal privacy garments, clothing can be removed prior to entering the decon shower, significantly improving the patient throughput of your shower system. DQE Doff-it® and Don-it® Personal Privacy Kits provide oversized garments that allow the victims to undress under the garment while maintaining modesty. These kits are color-coded and designated for pre- and post-decon for each phase of an emergency decontamination operation. *See page 16.*

LIGHTING

Decontamination doesn't always occur during the day. Make sure you have appropriate lighting to safely work within the decon area. A single Luminite Inflatable Light Tower can provide enough light for the entire decon area—even providing light for victims within the shower. Having a good light source also enables your facility to train at night—allowing you to engage night-shift team members. *See page 37.*

ACCOMMODATING ALL TYPES OF VICTIMS

Being able to accommodate more than one victim at a time is critical in multiple casualty chemical events. Consideration must be given not only to walking victims, but those that might have to be seated or decontaminated on a backboard. An additional collection pool and rollers are a very cost-effective and easy way to provide for non-ambulatory victims. *See page 7.*

DECONTAMINATION

STANDARD DECONTAMINATION SHOWER SYSTEM

DQE's leading portable decontamination shower. Quick set-up, patient privacy, thorough decontamination, and easy clean-up makes this shower the perfect choice for healthcare providers.

DQE proudly manufactures all of its decontamination showers in the USA.

Standard Decontamination Shower System

The "Standard" in decontamination showers, this system is the leading stand-alone solution for patient decon. The Standard Decon Shower meets the flow rates, spray pattern, and other performance characteristics set by the ANSI/ISEA 113-2013 standard. System includes shower with two vinyl carry bags, Standard Collection Pool (4' x 8'), and two Elevation Grids.

- HMK1101A** System with Aluminum-frame Standard Collection Pool
- HMK1101S** System with Steel-frame Standard Collection Pool
- HM1001C** Shower with Enclosure (no pool)
- HM1001CB** Shower (no pool or enclosure)

Shower Features:

- Unique quick-connects for fast assembly
- Fully collapsible design
- Four shower heads plus an independent hand-held sprayer
- Durable, chemical-resistant shower enclosure
- Translucent roof panel to allow light into shower for safety
- Shower stores and transports in two vinyl carry bags

System Specifications:

Shower

- Total output: 16.8 gpm (4.2 gpm per shower head)
- Dimensions: assembled – 42" x 36" x 84"; unassembled – 74" x 27" x 27"
- Weight: 104 lb
- Water inlet: standard garden hose

Pool

DECONTAMINATION

Decon Privacy Corridor System

This tailored, durable enclosure and Standard Decontamination Shower creates a decon system of three private chambers for each stage in the decon process. Victims disrobe and prepare for showering in stall one, shower in stall two, then proceed to stall three to dry off, don gown, and prepare for further treatment or transport. Translucent roof panels allow light into the corridor for safety every step of the way. The Decon Privacy Corridor System includes the Standard Decontamination Shower System, Decon Privacy Corridor, and a vinyl carry bag.

- HMK1300A** System with Aluminum-frame Standard Collection Pool
- HMK1300** System with Steel-frame Standard Collection Pool
- HM1003** Privacy Corridor Enclosure only

System Specifications:

Shower, Pool, Grids

- See *Standard Decontamination Shower System HMK1101*, page 6

Privacy Corridor

- Dimensions: assembled – 144" x 48" x 84"; unassembled – 74" x 9" x 9"
- Weight: 65 lb
- Material: chemical resistant vinyl

Standard Decon Shower HM1001C or
Standard Decon Shower System
HMK1101

Easy Roller™ Non-Ambulatory Decon System

Easily decontaminate non-ambulatory patients. Four independent rollers mount to the pool frame in seconds and allow a backboard to pass over the pool with minimal effort. System includes Standard Collection Pool, four stainless steel rollers, safety stops, and vinyl carry bag for rollers.

- HMK11045A** System with Aluminum-frame Standard Collection Pool
- HMK11045S** System with Steel-frame Standard Collection Pool
- HM1045** Rollers only, includes vinyl carry bag

System Specifications:

Pool

- Dimensions: unfolded – 48" x 96" x 14"; folded – 48" x 14" x 14"

Easy Rollers (4)

- Dimensions: each – 49" long; in storage bag – 52" x 8" x 8"
- Weight: 37 lb
- Load capacity: 300 lb

Easy Roller™ Upgrade **HM1045**

Designed exclusively for the DQE 4' x 8' Standard Collection Pool (steel or aluminum).

Purchase if you already own a
Standard Collection Pool
HM1048

DECONTAMINATION

DQE® DECON SHOWER QUALITY GUARANTEE

We stand behind the quality of DQE decontamination showers. Our decon showers carry a lifetime warranty against manufacturing and material defects. We offer *one free replacement part* over the life of any shower we manufacture (part code from product insert required).

MASCAS® Shower System HMK4101

The MASCAS Shower can be set up quickly and easily expanded to decontaminate multiple individuals simultaneously using 1-4 shower stalls and 2 additional hand-held sprayers. Divider curtains separate individual stalls for privacy. Unlike most mass casualty systems costing \$10,000 - \$20,000 and more, the DQE system is designed for cost-effective deployment as needed, delivering maximum flexibility and value. System includes MASCAS Shower and Flexible Containment Pool with vinyl carry bags, and MASCAS Elevation Grids.

HM4000

MASCAS Shower only

Shower Features:

- Modular design adjusts to each incident (1-4 stalls)
- At least three showerheads per stall (2.5 gpm each)
- Two independent hand-held sprayers for additional capacity
- Durable construction allows for repeated use
- Includes decon identification flag
- Easy transport and deployment from four durable vinyl bags
- Five divider curtains

System Specifications:

Shower

- Four stalls
- Total output: 35 gpm
- Dimensions: assembled – 120" x 36" x 84"; unassembled – 87" x 35" x 26"
- Weight: 180 lb (divided among four carry bags)
- Water inlet: standard garden hose

Pool

- See Flexible Containment Pool HM10126, page 11

Elevation Grids

- See Elevation Grid HM1022, page 14

Decon Wand HM6006

The perfect accessory to easily expand your existing system, or use alone for small-scale decon procedures. Simply connect this hand-held device to a standard garden hose and you are ready to begin. Wand disassembles into two pieces for compact storage, and assembles with quick-connect coupling. Valve allows for shutoff and water flow adjustment. Includes mesh bag for storage.

Specifications:

- Total output: 2.5 gpm
- Dimensions: assembled – 44.5" x 6" x 2.5"; unassembled – 25" x 6" x 2.5"
- Weight: 3 lb

Decon in a Bag® HM6000

Everything you need to perform gross decontamination in one convenient carry bag. Ideal for responders and facilities with limited HazMat resources (critical access hospitals, EMS, public health clinics, schools, and urgent care centers). Each kit contains all the necessary equipment for simple, yet effective decontamination. The kit includes waterproof decontamination instructions for easy reference throughout the procedure.

Each Kit Contains:

- Heavy-duty vinyl carry bag
- Decon Wand
- Compact Water Supply Hose
- Splash Suit Personal Protection Kit (2)
- Don-it® Post-Decon Personal Privacy Kit for victims (4)
- Collection bags for contaminated clothing (4)
- Decon Shower Sponge
- Liquid soap
- Waterproof decontamination instructions

DQE HEALTHCARE TRAINING & CONSULTING SPOTLIGHT

Decontamination Training:

Decontamination readiness is an essential capability for ensuring the safety of hospital staff during any hazardous substances incident. OSHA requires that hospitals provide ongoing training (Awareness, Operations, and Refresher) to personnel who are expected to decontaminate or interact with contaminated victims.

Our goal is to help hospitals attain a real, working level of decontamination preparedness and support that effort over time.

DQE Offers:

- Hospital Decon Site Survey
- Awareness Level Training
- Operations Level Training
- Decon Instructor Development Training
- What's Next Decon Sustainment Program
- Refresher Training
- Online Decon Training
- Emergency Decon Operations Planning
- Hospital Decontamination Drill

DECONTAMINATION

WATER COLLECTION

Pools, liners, barrels, and bladders for decon wastewater collection and leak containment.

Standard Collection Pool

The ideal collection pool for your decontamination equipment. This large volume framed pool is sturdy enough to support a victim on a backboard and can hold two DQE Standard Showers for dual decontamination. The pool folds for easy storage and features integrated carry handles for quick deployment. The heavy-duty, 22oz. vinyl, chemical resistant liner can be replaced as needed. Each pool holds two elevation grids (*see page 14*).

- HM1048AB** Aluminum-frame Standard Collection Pool
- HM1048SB** Steel-frame Standard Collection Pool
- HM1050** Replacement liner

Don't Forget...

- ⇒ **Electric Water Pump** *page 13*
- ⇒ **Wastewater Hose** *page 13*
- ⇒ **Water Supply Hose** *page 13*

Specifications:

- Dimensions: unfolded – 48" x 96" x 14"; folded – 48" x 14" x 14"
- Weight: aluminum frame – 47 lb, steel frame – 63 lb
- Capacity: 300 gallon

Compact Collection Pool

Designed for use with all DQE single-stall showers, this pool is best for limited-space applications. Same sturdy design as the Standard Collection Pool, but half the length. Holds one elevation grid (*see page 14*).

- HM1044AB** Aluminum-frame Compact Collection Pool
- HM1044SB** Steel-frame Compact Collection Pool
- HM1051** Replacement liner

Specifications:

- Dimensions: unfolded – 4' x 46" x 14"; folded – 4' x 8" x 14"
- Weight: aluminum frame – 32 lb, steel frame – 37 lb
- Capacity: 150 gallon

Disposable Collection Pool **HM1049**

This Disposable Collection Pool is designed for single incident use. The pre-attached liner with double-wall cardboard frame sets up quickly and allows the unit to be simply folded up and discarded after the incident. The liner is made of heavy, 12mil UV-resistant polyethylene.

Specifications:

- Dimensions: unfolded, 5' x 5' x 13"; folded, 22" x 32" x 6"
- Weight: 11 lb

Flexible Containment Pool

An inexpensive, quick deploying collection pool for versatile use in decon and HazMat operations. This heavy-duty 18 oz. vinyl fabric is highly resistant to tears and punctures, folds up compactly for storage, and can be decontaminated for reuse. Unless otherwise noted, sides and rims are self-supported, requiring no additional wall support during use. *Custom sizes and colors available.*

HM1040 30" x 30" x 4", 14 gallon capacity

HM1041 4' x 4' x 4", 36 gallon capacity

HM1042 5' x 5' x 4", 56 gallon capacity

HM1043 5' x 10' x 4", 122 gallon capacity - *Sidewall angled support straps and embedded vertical stiffening pegs included. Brass tie-down grommets in each corner.*

HM10126 5.5' x 11' x 6", 213 gallon capacity - *Sidewall aluminum support brackets included.*

Foam Wall Containment Pool **HM1081**

Quick deploying collection pool for versatile use in decon and HazMat operations. This vinyl containment pool has sturdy foam side walls for durable containment of spills and decon runoff. *Custom sizes available.*

Specifications:

- Dimensions: 2.5' x 5' x 4"
- Made of 22 oz. vinyl
- Fits under Equipment Decon Station (HM1080)
- Weight: 8 lb

Flexible Wastewater Tank

Fully collapsible wastewater bladder is convenient to use and folds flat for easy storage. Inlets sized for standard garden hose with 1.5" ball valve for drainage. Tank made of 22 oz chemical-resistant vinyl. *Custom sizes are available.*

HM150B 150 gallon - 48" x 60" x 12" (filled) - *Weight: 16 lb (unfilled), single inlet*

HM1000B 1000 gallon - 144" x 84" x 24" (filled) - *Weight: 37 lb (unfilled), dual inlet*

Decon Wastewater Barrel **HM450**

Closed-head drum constructed of high-molecular, FDA approved polyethylene. Crack-resistant walls are .125" thick; will not rust or corrode.

Specifications:

- Dimensions: 23" x 35.8"
- Capacity: 55 gallon
- Weight: 26 lb
- BPA- free

DECONTAMINATION

DECON BRUSHES

Round Scrub Brush *HMS1521*

Multi-purpose stiff bristled brush that can be used in suit and equipment decon.

Short Handled Brush *HMS1522*

This short handled, chemical resistant brush is designed to fit your hand for easy cleanup. This highly durable brush is excellent for remediation and equipment decontamination. Stiff polyester bristles. Bristle block dimensions: 3" x 10". Bristle length: 1.3".

Tool Brush *HMS1523*

Stiff-bristled tool brush for decontaminating hard to reach surfaces. Excellent for cleaning respirators, helmets, monitors, or other HazMat equipment. Stiff polyester bristles. Bristle length: 1". Brush length: 11".

Decon Responder Brush *HM550*

Long-handled, stiff-bristled brush enables responders to thoroughly decontaminate equipment and protective suits prior to doffing. Natural bristles resist high heat and acids. Bristle fiber softens when wet. Bristle length: 2". Handle length: 20".

Decon Shower Sponge *HM556*

Disposable, long-handled sponge allows victims to decon themselves gently, yet thoroughly.

Supersoft Decon Brush

Used for decontaminating skin or HazMat suits. Flow-thru capability. For use with either the Decon Brush Handle (HM544) or the Telescoping Decon Brush Handle (HM545).

- HM540** Supersoft Decon Brush - 8"
- HM541** Supersoft Decon Brush - 10"

Chemical Resistant Decon Brush

Used for decontamination of HazMat suits. Flow-thru capability. Has soft nylux bristles that are gentle on protective gear, and are high heat and chemical resistant. For use with either the Decon Brush Handle (HM544) or the Telescoping Decon Brush Handle (HM545). Bristle colors may vary.

- HM542** Chemical Resistant Decon Brush - 8"
- HM543** Chemical Resistant Decon Brush - 10"

Decon Brush Handle *HM544*

60" handle for use with DQE brush heads. Standard duty fiberglass 15/16" pole handle.

Telescoping Flow-Thru Decon Brush Handle *HM545*

For use with decon brush heads. Length extends from 38" to 71". Flow-thru capability has water on/off switch. Has soft grips for comfortable handling.

DECON ACCESSORIES

Compact Water Supply Hose **HM202**

White 50', flat, rolled hose. This durable hose minimizes storage without reducing flow capacity. 0.625" i.d. Standard garden hose fittings.

Wastewater Hose **HM1065**

Red 25' heavy-duty hose connects to both our electric and manual water pumps and directs contaminated water to wastewater container. 0.5" i.d. with solid brass standard garden hose fittings. *Custom lengths available.*

Water Supply Hose **HM200**

Grey 50', heavy-duty hose. For use with hot or cold water. 0.5" i.d. with solid brass standard garden hose fittings. *Custom lengths available.*

Electric Water Pump **HM1060**

Pumps water from collection pool to wastewater container (see page 11). Uses standard garden hose. 115V, 10 amp, 19 gpm maximum output. Extension cord sold separately.

Extension Cord **HM1070 (not shown)**

12/3 gage extension cord that is safe for outdoor use with electric water pump or other decon equipment requiring electricity. Length: 50'. 3 outlet female end.

Manual Water Pump **HM1061**

Foot-activated operation. Chemical resistant Neoprene diaphragm and Delrin body. Comes complete with two 6' lengths. Solid brass, standard garden hose fittings. Total output: 10 gpm.

Single Shower Fire Hose Reducing Kit **HM208**

Reduces a 1.5" NHT fire hose to one standard male garden hose fitting. Includes pressure-limiting valve and 8' heavy duty garden hose. *Contact us for additional available hose lengths and reducer thread types and sizes.*

Fire Hose Reducing Manifold **RV100**

Constructed of schedule 80 PVC piping and durable brass spigots, this manifold reduces a 1.5" fire hose down to four standard garden hose spigots. Connects to fire hose using attached alloy swivel adapter. Rated for max 235 psi.

Grip-and-Spray Nozzle **HM213**

Adjustable hand-held spray nozzle. Ideal for equipment decon. Compact and light weight, single hand operation. Adjustable twist control from forceful stream, to broad spray, to off. Rubber clad contour grip in high-visibility yellow, over a metal core. Brass spray tip. Compatible with all DQE decon shower systems. Standard garden hose connection.

Fan Spray Nozzle **HM214**

Hand-held broad fan drenching nozzle, ideal for victim decon. Less forceful drenching spray more suitable for exposed or sensitive body areas. Compact and lightweight, single hand operation with shut off lever. Rubber clad contour grip over metal core with stainless spray screen. Compatible with all DQE decon shower systems. Standard garden hose connection.

Sandbag **HM1075**

Sandbags help to stabilize equipment and ground tarps in windy conditions. Dimensions: 8.5" x 10" x 2". Weight - 5 lb. Pre-filled. Heavy-duty vinyl sealed. Attached carry handle. Hook strap to secure to equipment.

DECON ACCESSORIES

Zone Tarp

Zone Tarps are available in various colors for designating zones in a decontamination corridor, triage, or other response areas. The 14 oz tarp fabric is resistant to cold weather, fraying and tearing. The zone tarps are waterproof and have built-in UV protection. Dimensions: 12' x 12'. 14 oz vinyl coated polyester. Tear and mildew resistant. Rust resistant brass grommets every 2' along all the edges and at corners.

Additional colors, sizes, and vinyl weights are available, contact us for details.

- HM1035** Zone Tarp - Blue
- HM1036** Zone Tarp - Red
- HM1037** Zone Tarp - Yellow
- HM1038** Zone Tarp - Green
- HM1039** Zone Tarp - Black

Economy Ground Tarp **HM1030**

Provides splash protection for the decon area and protects pool bottoms from abrasion and puncture. Made of 3 oz woven polyethylene. Dimensions: 16' x 20'.

Sack-it™ Clean-Up Dispenser **HM375**

Convenient and portable, this system allows contaminated clothing, linens or waste to be collected, contained and identified simply and affordably. Kit includes a folding bag holder and a box of 20 super-thick, 3-mil bags with draw-cord closure. Replacement bags available.

Sack-it™ Clean-Up Bags **HM380**

Heavy-duty, 3-mil replacement bags with draw-cord closure. Bag includes writing space for listing contents. Box of 20.

Equipment Protection Mats **HM1031**

Use under elevation grids and decon pools to protect pool liners. Provides a clean protected area to lay equipment, tools and supplies during an emergency response event. 12 mil polyethylene. Dimensions: 36" x 36". Box of 5.

Disposable Washcloths **HM706**

Soft, disposable washcloths for use during decontamination. Dimensions: 10" x 10". Box of 40.

Dry-it™ Disposable Towels **HM705**

The "it" is up to you!

Soft enough for skin, strong enough for spills, these versatile, disposable towels are made of soft, absorbent material and are ideal for drying victims after decontamination. Bath-towel size and extra absorbency mean they're great for clean-up. They come in their own easy-to-use dispenser box, so they're simple to store and transport. 100 towels per roll.

Decon Sprayer

Easily apply soap solutions to responders during the decontamination process. Lightweight with shoulder strap. Pressure relief valve. No spill funnel top. Adjustable nozzle sprayer.

- HM6210** 2 Gallon
- HM6211** 1 Gallon

Storage Bin

Handy storage for your HazMat personal protection equipment and supplies. High-density polyethylene with attached hinged cover opens and closes easily for ready access. Hand grips for carrying; non-slip bottom surface. Opening for lid security locks.

- HM250** 28" x 21" x 15" Storage Bin, Capacity: 3.6 cu. ft.
- HM255** 34" x 24" x 20" Storage Bin, Capacity: 6.1 cu. ft.

Safety Seals **RP700**

Securely deters entry, yet is easily removed. Each plastic security seal has 30 locking positions. Self-locking plastic seal - no tools required. Numbered for record keeping purposes. Box of 20.

Elevation Grid

Prevents responders from standing in contaminated water. Constructed of durable polypropylene.

- HM1023** Elevation Grid - 36" x 24" x 5.5", use two for Standard Collection Pool, one for Compact Collection Pool
- HM1022** MASCAS® Elevation Grid - 24" x 24" 2.75", use eight for MASCAS Collection Pool

Zone Tape

Zone Tape creates a barrier to identify zones in a HazMat event. The tape is lightweight, but strong enough to be reused many times. Deploy rapidly by wrapping around trees, poles, and barrels; or it can be secured to walls or barricades. The hot zone is where the contaminated area is located. The warm zone is where the decontamination area is located. The cold zone is for post-decon treatment or the command post. 500 foot roll.

HM4071 Hot Zone Tape

HM4072 Cold Zone Tape

HM4073 Warm Zone Tape

Zone Tape Dispenser HM408

Dispenser virtually eliminates problems with dispensing barricade tape. Easy unroll tape without tangling or dropping the roll. A built-in cutting edge conveniently cuts tape to the desired length. Holds 500 or 1000 foot rolls of 3 inch wide barricade tape.

Barricade Tape

Secures area during a HazMat incident.

HM405 "Hazardous Materials. Do Not Enter" - 500'

HM415 "Caution" - 500'

HM416 "Caution" - 300'

Decon Utility Stool HM805

This Decon Stool is a quick and convenient way to introduce a seating option during the decon process. Integrated bucket provides storage for soap, brushes, sponges and other decon items. Stool made of sturdy, high-density, industrial-grade PVC. Rubber bucket is highly chemical resistant. Bright orange colored feet for increased visibility among other tools. Sturdy cross-legs and moderate height provide stability while seated. Dimensions: base 21", height 23", seating surface 13" dia.

Decon Clothes Bucket with Lid HM350

Prevents cross-contamination and secures personal items. Meets standards for collecting and containing waste items such as contaminated clothing and towels. Capacity: 5 gallon.

Decon Team Disposable Vests IC1400

Decon vests identify the roles during a decontamination operation. Contains 17 vests: (1) Decon Unit Leader, (4) Decon Operations, (4) Decon Suit Support, (4) Decon Equipment Support, (4) Decon Security.

Decon Team Cooling Vests

These vests are functional within ICS and provide decon team-specific identification as well as optional cooling comfort for those in, or out of, protective suits. Multiple vest sets include a Duffle bag. The Cool Packs that fit in the vest pockets are sold separately.

RP61012 Decon Team Cooling Vest - 12 pack
Vest Set Contains 12 Cooling Vests: (1) Decon Team Leader, (2) Operations Team, (2) Suit Support, (3) Equipment Support, (4) Security

RP6105 Decon Team Cooling Vest - 5 pack
Vest Set Contain 5 Cooling Vests: (1) Decon Team Leader, (2) Operations Team, (1) Suit Support, (1) Equipment Support.

RP6101 Blank Single

Additional Vest Labels Sold Separately:

RP610L1 Decon Team Leader	RP610L4 Equipment Support
RP610L2 Operations Team	RP610L5 Security
RP610L3 Suit Support	

Cool Packs RP606

Keep cool packs in hand for prolonged cooling in the zipper front cooling vests, concealable cooling vests, and decon team cooling vests. Cooling gel in the cool packs remains thermally stable at 59°F (15°C) during use. Recharges in 20 minutes or less. The cool packs are filled with a non-chemical, non-toxic formula.

Emergency Warming Blankets HM701

Ultra light, ultra compact Mylar® blanket retains body heat for emergency warmth. Sold in packs of 5. Unfolded: 55" x 82", folded: 3" x 5" x 1".

DECONTAMINATION

PERSONAL PRIVACY

Doff-it® Personal Privacy Kit – Adult

The original — designed to increase patient compliance with clothing removal for decontamination. The Doff-it large over-garment lets patients disrobe while remaining completely covered. Each sealed kit contains a Doff-it personal privacy garment (fits size XS to XXXL), collection bag for contaminated clothing, clear zipper-seal plastic bag for personal valuables, foot covers, moist towelettes, dry paper towel and pen. Excellent first step in all emergency decontamination operations.

HMDOFFIT Individual kit

HMDOFFBX Box of 20 kits

Doff-it® Personal Privacy Kit – Youth

Identical to the Doff-it Personal Privacy Kit for adults, but with a youth-sized overgarment and foot covers for patients from 5 to 12 years old.

HMDOFFIT-Y Individual kit

HMDOFFBX-Y Box of 20 kits

5 EASY STEPS FOR USING PRIVACY KITS

Doff-it® Personal Privacy Kit:

- 1** Remove overgarments and any other clothing that doesn't compromise privacy. Place these items in the provided orange bag. 
- 2** Place white Doff-it gown over clothing. 
- 3** Remove personal items and valuables and place them in the outer red bag. You will keep this bag with you. 
- 4** Bring arms inside of the Doff-it and undress. Remove all clothing and place it in the orange bag. 
- 5** With the pen, write your name on both bags. Use the wet wipe and towel to wipe away any residue on your skin. Await further instruction for decontamination. 

Don-it® Post-Decon Privacy Kit:

- 1** Complete a soap and water decontamination procedure. 
- 2** After decon showering, dry off using the supplied towel. 
- 3** Put on the Don-it gown and foot covers before leaving the shower area. 
- 4** Always follow the emergency responders' instructions about where to proceed for further treatment, if any. 
- 5** The thin, silver Mylar® blanket provides comfort and protection in low temperatures. 

Don-it® Post-Decon Privacy Kit – Adult

While Doff-it provides privacy before decontamination, the Don-it kit is the original post-decon kit that ensures the same privacy and protection after soap and water showering. Each sealed kit includes a Don-it personal privacy garment, foot covers, drying towel, emergency warming blanket and small hair brush, all in a compact package.

HMDONIT Individual kit
HMDONBX Box of 20 kits

Don-it® Post-Decon Privacy Kit – Youth

Identical to the Don-it Post-Decon Privacy Kit for adults, but with a youth-sized overgarment and foot covers for victims from 5 to 12 years old.

HMDONIT-Y Individual kit
HMDONBX-Y Box of 20 kits

Privacy Cube MC5022

Provide needed privacy space quickly and efficiently with the Privacy Cube. The Privacy Cube assembles to create a square-shaped area with a variety of emergency response uses.

The four-panel partition system is lightweight and folds flat for easy storage. The screens adjust into multiple configurations beyond a square-shape, and has even greater versatility when used alongside the Privacy Screen (MC4022). Includes a canvas bag for transport and 3 sandbags for extra stability outdoors or on uneven ground. Easy snap-fit assembly required.

MC5022RS Replacement Screen Assembly

Specifications:

- Cube dimensions: 62" x 62" x 74"
- Closed screen dimensions for storage: 62" x 74" x 5"
- Weight: 20 lb (35 lb with added sandbags)

Privacy Screen MC4022

The portable, disposable solution to privacy for a variety of applications. Constructed of lightweight PVC. Ships unassembled. Replacement screens available. 70" H x 63" W, 3 lb, collapsible.

MC4022RS Replacement Screens - Pack of 3

PERSONAL PROTECTION

CHEMICAL PROTECTIVE EQUIPMENT

-sizing charts

HazMat Personal Protection Kit *HM4038*

This Zytron® 200 coverall kit shields responders directly involved in HazMat emergency response and victim decontamination. Available in sizes S/M, L/XL, 2XL/3XL, 4XL.

HM1215 Kappler® Zytron® 200 Coverall

Each Sealed Kit Contains:

- One laminated, multi-layer hooded coverall with sealed seams, storm flap and integrated booties
- One pair of outer nitrile gloves
- One pair of nitrile exam gloves (2 sizes)
- Vinyl overboots
- Boot liners
- 8 pre-measured ChemTape® strips
- Non-vented goggles
- N95 protective mask

HazMat PPE Base Kit *HM4037*

The HazMat PPE Base Kit allows for customization to adjust for your needed level of protection while reducing sourcing, stocking, and deployment time. This kit includes a Kappler® Zytron® 200 coverall and the essential accessories to integrate your choice of outer gloves, footwear, and respiratory protection. Available in sizes S/M, L/XL, 2XL/3XL, 4XL.

Each Sealed Kit Contains:

- One multi-layer hooded coverall with sealed seams, storm flap and integrated booties
- One pair of boot liners
- 8 pre-measured ChemTape® strips
- One pair of nitrile exam gloves (2 sizes)

Splash Protection Kit **PR325**

Provides light splash protection for support personnel during the decontamination process and cleanup. Available in sizes M-4XL.

HM1210 DuPont™ Tychem® 2000 Coverall

Each Sealed Kit Contains:

- One hooded coverall with sewn seams and integrated booties
- Nitrile gloves (2 sizes)
- Vinyl overboots
- Non-vented goggles
- N95 protective mask

On-Scene Protective Kit **HM311**

Ideal protection when exposure to particles and aerosols is anticipated. The suit's breathable material allows for longer wear times and added comfort. Available in sizes S-4XL.

HM1205 DuPont™ ProShield® 60 Coverall

Each Sealed Kit Contains:

- One hooded, coverall with integrated, slip-resistant booties (no overboots required)
- Nitrile gloves (2 sizes)
- Non-vented goggles
- N95 protective mask

DuPont™ Tychem® 5000 Coverall **HM1221**

DuPont™ Tychem® 5000 personal protective suit shields responders directly involved in HazMat response. One laminated, multi-layer hooded coverall with sealed seams. Front zipper closure with taped storm flap, elastic wrist, and integrated booties. Tychem® 5000 provides at least 30 minutes of protection against over 150 chemical challenges. NFPA and Berry compliant options available. Available in sizes S-4XL.

Kappler® Zytron® 300 Coverall **HM1218**

For rigorous activities and rugged situations involving liquid splash. Kappler® Zytron® 300 personal protective clothing shields responders directly involved in Hazardous Materials emergency response. One laminated, multi-layer hooded coverall with sealed seams, front zipper with Velcro closure, elastic wrist, and integrated booties with overflap. NFPA and Berry Compliant options available. Available in combination sizing: S/M, L/XL, 2XL/3XL, 4XL.

Kappler® Zytron® 100 XP Coverall **HM1225**

Ideal for training use, this inexpensive and reusable hooded Zytron® 100 XP suit with attached hood and booties provides splash protection for wet training drills and gives users the feel of full personal protective equipment. Purchase gloves, boots, and boot liners separately (see page 22). Available in sizes S/M, L/XL, 2XL/3XL, 4XL.

DuPont™ Tychem® 4000 Coverall **HM1201**

The DuPont™ Tychem® 4000 provides dependable and economical protection against a broad spectrum of hazardous chemicals and particles. Lightweight fabric made of Tyvek®, laminated with chemical-resistant Dow Saranex 23P film. Rugged and durable construction, with reduced tears and abrasion risk. Sealed seams and storm-flapped zippers. White for high visibility. Available in sizes S-4XL.

DuPont™ Tychem® 6000 Coverall **HM1219**

DuPont™ Tychem® 6000 personal protective clothing shields responders directly involved in HazMat emergency response and decontamination. Available in sizes S-4XL.

HM1220 DuPont™ Tychem® 6000 Coverall w/o Booties

Can't find the PPE you need?

The search stops with DQE. We work with leading PPE manufacturers including 3M™, DuPont™, Kappler®, Ansell, North®, Tingley, MSA, and Honeywell. We will work with you to find the proper type of equipment, brands and sizes of HazMat suits, respirators, and accessories.

PERSONAL PROTECTION

BLOOD AND VIRUS PROTECTION KITS

Remain protected when managing a crisis and providing care to those in need, and prevent the transmission of infectious agents with SafePaq® and SafePaq® Plus Blood & Virus Protection Kits. The breathable coverall material meets ASTM F1670/F1671 standards for blood and viral penetration resistance.

The contents were chosen with special attention to their utility for healthcare workers. For example, the material of the coverall is breathable to be more comfortable while working. Two thicknesses of gloves were chosen, so a heavier glove could be worn as an outer glove. The disposable apron can tear off from your neck for disposal, avoiding the need for having potentially hazardous scissors around to cut the straps.

SafePaq® Blood and Virus Protection Kits *HM5911*

The SafePaq does not include head protection, so it's the PPE solution for users who plan to wear a PAPR for respirator protection. Additional head, face and respiratory protection may be required. Available in sizes S/M, L/XL, 2XL/3XL, 4XL. Contains: 10 individually-wrapped kits in a convenient dispenser box.

Each Sealed SafePaq Contains:

- One Kappler® ProVent® 10,000 blood and fluid resistant coverall with taped seams, elastic wrists, thumb loops, zipper closure with taped flap and skid resistant integrated booties
- Two pair of 5 mil nitrile exam gloves (2 sizes)
- Two pair of 8 mil extended cuff nitrile exam gloves (2 sizes)
- One disposable apron
- One pair of overboots
- Two germicidal wipes

SafePaq® Plus Blood and Virus Protection Kit *HM5912*

The SafePaq Plus includes head protection, for users that are not wearing a PAPR. Available in sizes S/M, L/XL, 2XL/3XL, 4XL. Contains: 10 individually-wrapped kits in a convenient dispenser box.

Each Sealed SafePaq Contains:

- One Kappler® ProVent® 10,000 blood and fluid resistant coverall with taped seams, elastic wrists, thumb loops, zipper closure with taped flap and skid resistant integrated booties
- Two pair of 5 mil nitrile exam gloves
- Two pair of 8 mil extended cuff nitrile exam gloves
- One pair of overboots
- One N95 mask
- One disposable apron
- One face shield with protective drape
- One protective hood
- Two germicidal wipes

StatPak™ Standard Precautions Kits

DQE simplifies caregiver protection with StatPak—prepackaged protection against infectious agents in a single, convenient kit, complete with a wall dispenser for “grab and go” use. Designed to prevent transmission and break the chain of infection. Available in a dispenser box of 10 kits, or a case of 6 dispenser boxes.

HM4911 Box of 10 individually-wrapped kits

HM4911C Case of 6 boxes

Each Sealed StatPak Contains:

- One barrier protective gown
- Nitrile gloves (3 sizes: S, M, L)
- Shoe covers
- N95 particulate mask
- One pair of indirect vent safety glasses

Fight the spread of human waste related infections with the Sani-Bag+. See page 49.

Disposable Lab Coats **PR235**

Economical, fluid-resistant outer layer for healthcare providers. Made of 50 gsm microporous laminate. Full cut - 45" long. 6 snap front closure. Knit collar and cuffs. 3 sewn-on pockets. Available in M or XL. Other sizes available by special order. Box of 30 individually wrapped lab coats.

Kappler® ProVent® 10,000 Coverall

This blood and virus protective coverall has taped seams, elastic wrists, thumb loops, zipper closure with taped flap and skid-resistant integrated booties. The microporous fabric technology provides impermeability protection along with breathability. The thumb loops keep the sleeves securely in place under gloves. The coverall material passes both ASTM F1670 blood penetration and ASTM F1671 viral penetration tests. Available in sizes S/M, L/XL, 2XL/3XL, 4XL.

HM1208 Kappler® ProVent® 10,000 Coverall

HM1207 Kappler® ProVent® 10,000 Hooded Coverall

Disposable Apron **HM1360**

Lightweight, disposable apron with poly-waist ties and a pullover neck loop. Neck straps have a tear-away neck loop for easy removal, avoiding the need for having potentially hazardous scissors around to cut the straps. Material: 1.75 mil Polyethylene – embossed. Size: 28" x 34 1/2". Latex free. Box of 100.

Heavy Duty Apron **HM1365**

This apron provides robust impermeable protection over primary PPE. Chemical, cut, tear, puncture resistant apron with vinyl waist ties and pullover neck loop. Material: 8 mil PVC Vinyl. Size: 33" x 44 1/2". Latex free. Box of 12.

PERSONAL PROTECTION

BOOTS AND GLOVES

All HazMat boots provide extreme protection and excellent traction to ensure the wearer remains safe. DQE chemical resistant gloves have various thicknesses available, so you can determine the protection level and tactile quality that best fits your needs.

HazMat Overboot

HM1250

Stretch latex overboot is 12" in height and 15 mil thick. Available in men's sizes M (8-9), L (10-11), and XL (12-13).

Economy HazMat Boot

HM1253

The perfect rigid-sole boot for low-level decon operations. Non-steel toe. Available in whole sizes 9-12. Other sizes available via special order.

Vinyl Overboot

HM1260

An extra layer of protection for various applications. They are excellent for use in spill cleanups. Slip 16" high overboots on easily over most shoes and boots. Elastic top for a secure and snug fit. 100% waterproof. Available in sizes M (*fits over men's sizes 6-8*), L (*fits over men's sizes 9-11*) and XL (*fits over men's sizes 12-14*).

Tingley HazProof® Response Boot

HM1254

Made of special polymer material, this comfortable boot meets the protective footwear chemical permeation requirements of NFPA 1991 Standard on Vapor - Protective Ensembles for Hazardous Materials Emergencies 2005 Edition. The HazProof boot has also been tested to Military Standard 282 and will provide protection against certain chemical warfare blister and nerve agents. Available in sizes 7-13.

SF™ SuperFit Premium Overboot

HM1252

This latex-free boot features a highly durable injection-molded construction with tabbed grips and elastic loops. This one-piece design helps eliminate leaks. Slip resistant, self-cleaning outsole. Available in men's sizes M (9-10), L (11-13) and XL (14-15).

Onguard Hazmax® Knee Boots

HM1256

Protective, chemical resistant, 16" high, steel toe boots for hazardous materials handling. Available in sizes S, M, L and XL.

Knee-High Overshoe

HM1270

Liquid-resistant, polycoated fabric shoe cover with vinyl-textured sole. Elastic top, 18" high overshoes. Material: Polycoated uppers. Vinyl sole. Elastic top and ankle. Available in sizes M - 13" long (*shoe size 8-10*) and XL - 16" long (*shoe size 10-12*).

Onguard Hazmax® EZ-Fit Boots

HM1255

These 11" high, steel toe boots are designed for easy donning and doffing while wearing a chemical protective suit. EZ-fit boots feature a wider opening to assist with wearing protective coveralls with attached booties and large kickoff lugs for easy, hands-free removal. Available in men's sizes: 6-15.

North® HazMat Boot Liners

HM35350

3mm thick inner boot liners provide added safety and a temporary barrier when doffing contaminated protective clothing. Box of 50 (25 pair).

GLOVE SIZE CHART

Size (Numerical)	Size (Lettered)	Inches
6	XS	5-6
7	S	6-7
8	M	7-8
9	L	8-9
10	XL	9-10
11	XXL	10-11

To help determine the correct size, measure around the middle part of the dominant hand

Nitrile Exam Gloves – 5 mil

HM3716

“Exam” style gloves provide superior tactile quality. Excellent inner glove when paired with 16 mil Butyl. Available in sizes S, M, L and XL. Box of 100 gloves.

North® Butyl Glove – 7mil

HM37184

Butyl excels as a chemical barrier except against petroleum and other hydrocarbons. Perfect inner glove when used in conjunction with 16 mil Nitrile. Smooth finish for tactile quality. Available in sizes M, L and XL.

Nitrile Extended Cuff Exam Gloves – 8 mil **HM3715**

Extended cuff “exam” style gloves that provide superior tactile quality. 8 mil nitrile gloves. Lightly powdered. Chemical resistant. 12 inches long. Latex free. Available in sizes S, M, L and XL.

Nitrile Glove – 15 mil

HM37175

Lined, nitrile “case hardened” composition provides good chemical resistance against petroleum and hydrocarbon based chemicals. Perfect outer glove when used with 7 mil Butyl inner glove. Available in sizes 8, 9, 10 and 11.

Two layers of gloves are ideal. For superior chemical protection, use a combination of Nitrile and Butyl rubber.

North® Butyl Glove – 16 mil

HM3718

Tough outer glove with rough finish for superior grip. Butyl excels as a chemical barrier. Perfect outer glove when used with 7 mil Nitrile inner glove. Available in sizes 9, 10 and 11.

Silver Shield® Gloves/Glove Liners **HM3719**

Ideal for spill cleanups, HazMat control operations and medical laboratories. Resists permeation and breakthrough by more toxic/hazardous materials than any other type of glove. Made from Norfoil, a lightweight, flexible laminate. Available in sizes 9, 10 and 11.

PERSONAL PROTECTION

PERSONAL PROTECTION ACCESSORIES

Disposable Face Shield with Protective Drape **HM3735**

Disposable full face shield with attached fluid barrier fabric. The barrier fabric cups under the chin to provide extra splash protection. 6" attached, fluid-barrier fabric. Contoured foam across forehead. Anti-fog. Size: 9"x13". Latex free. Box of 50.

Protective Hood **HM1350**

Protective hood using breathable, Kappler® ProVent® 10,000 material with taped seams. Wear over a non-hooded gown or coverall to provide full head protection. Latex free, elastic face. The hood material meets ASTM F1670/F1671 standards for blood and viral penetration resistance. Size: one size fits most. Box of 30.

FYI: Leaks are most likely to occur where tape is used to seal gloves and boots to the chemical-resistant suit. Reduce this occurrence by folding excess material flat before taping.

ChemTape® Roll **HM410**

Used to seal gloves and boots to a chemical-resistant suit, Kappler® ChemTape® provides superior chemical resistance and adhesion. 60-yard roll.

Safety Glasses **HM3730**

Interlocking sideshield system offers all-around protection from flying particles. Large, clear lens provides a wide viewing field.

ChemTape® Strips **HM410S**

Easy-to-use, pre-cut strips. Dimensions: 18" long x 1 7/8" wide. Pack of 24 strips.

Safety Goggles

These soft-sided goggles protect eyes against chemical exposure, have a clear lens and frame, and anti-scratch coating. The soft vinyl body molds snugly to the face without pressure or irritation. The elastic braid strap threads through the frame for easy adjustment. Meets ANSI Z87.1 High Impact Requirements. Fits over most prescription eyewear.

Duct Tape Roll **HM400**

Provides seal protection and is good for attaching gloves and boots to protective suits. 30-yard roll.

HM3721 Safety Goggle – Vented

HM3720 Safety Goggle – Non-Vented

CREATE YOUR OWN SUIT KIT

Your choice of protective gear, ready for your next response.

You can customize PPE ensembles for specific field applications and package them in various types of protective containers for easy storage. Choose which suits, gloves, boots, and respirators you need and DQE will do the rest. Custom suit kits give you *grab-and-go* protection at a moment's notice. Contact our customer service team to get started.

PERSONAL PROTECTION

RESPIRATORY PROTECTION

There is a variety of respirators for every individual need and application. DQE provides respirators that are comfortable, reliable, and offer broad protection against a range of hazards. Need a specific type of respirator or accessory? DQE can help. Call the DQE sales team at 800-355-4628.

3M™ Breathe Easy™ PAPR System-CBRN

This complete NIOSH CBRN certified powered air purifying respirator system helps provide protection against CBRN particulates, gases, and vapors. It is uniquely designed for first responder, first receiver, and public health professionals. The lightweight, one size butyl rubber hood provides a wide field of vision, no fit test requirements and ability to use with eye glasses. The continuously filtered airflow provides maximum comfort to help workers focus on their jobs for longer periods. Battery charger sold separately.

- HM5550** Breathe Easy™ PAPR System CBRN with NiMH rechargeable battery*
- HM5550L** Breathe Easy™ PAPR System CBRN with Lithium non-rechargeable battery (up to 12 hours of use)

Kit Includes:

- Blower unit and belt assembly
- **HM5552** 3M™ Butyl Rubber Hood
- **HM5555** 3M™ CBRN Breathing Tube Assembly
- **HM5556** 3M™ RBE-57 CBRN Multi-Contaminant Filter Cartridge (3 cartridges)
- Airflow indicator
- Duffle bag

** 3M has discontinued the battery chargers for its Breathe Easy NiMH batteries. Only select this unit (HM5550) if you have existing battery charger(s).*

3M™ Breathe Easy™ PAPR System

This complete NIOSH CBRN certified powered air purifying respirator system helps provide protection against CBRN particulates, gases, and vapors. It is uniquely designed for first responder, first receiver, and public health professionals. The lightweight, one size butyl rubber hood provides a wide field of vision, no fit test requirements and ability to use with eye glasses. - **HM5503** 3M™ Breathing Tube Assembly
- **HM5506** 3M™ FR-57 Multi-Contaminant Filter Cartridge (3 cartridges)
- Airflow indicator

** 3M has discontinued the battery chargers for its Breathe Easy NiMH batteries. Only select this unit (HM5500A) if you have existing battery charger(s).*

3M™ Versaflo™ 300 PAPR Kit

The 3M™ Versaflo™ 300 PAPR is a lightweight, compact and well-balanced belt-mounted unit for positive pressure respiratory protection against airborne particulates. The slim profile is designed for use in tight spaces, and the smooth contoured outer surface is less prone to snagging on nearby objects, making the Versaflo™ 300 ideal for healthcare settings. Two types of alarms - one audible and one LED - alert the user to either a low battery or low airflow. The air inlet draws air from the bottom of the unit, making it easier for the wearer to sit without blocking the airflow intake. The small, single air inlet helps make decontamination easier and faster. The breathing tube features a quick release swivel connection, which connects quickly to the headgear and is designed to minimize loops and kinks in the breathing tube. The Easy Clean Belt allows for thorough cleaning and reuse. Battery Life: 8-12 hours. Battery charger sold separately.

- HM5814** 3M™ Versaflo™ 300 PAPR Kit
- HM5813** 3M™ Versaflo™ 300 PAPR Kit with Hood
- HM5800L** 3M™ Versaflo™ 300 PAPR Kit - Large Headcover
- HM5800S** 3M™ Versaflo™ 300 PAPR Kit - Small Headcover

Kit Includes:

- Blower unit
- **HM5511** 3M™ Breathing Tube Assembly – Versaflo™ 300
- **HM5805** 3M™ HE Filter – Versaflo™ 300
- **HM5806** 3M™ Airflow Indicator – Versaflo™ 300
- **HM5807** 3M™ High Capacity Battery – Versaflo™ 300
- **HM5810** 3M™ Easy Clean Belt – Versaflo™ 300

3M™ Versaflo™ 600 PAPR Kit with Hood **HM5600**

The 3M™ Versaflo™ 600 blower unit has multiple speeds, audible, visual and vibratory alarms and the capacity to work with a wide variety of headtops, filters, and cartridges. PAPR is a lightweight, compact and well-balanced belt-mounted unit for positive pressure respiratory protection against airborne particulates. The slim profile is designed for use in tight spaces, and the smooth contoured outer surface is less prone to snagging on nearby objects, making the Versaflo™ 600 ideal for healthcare settings. Battery charger sold separately.

Kit Includes:

- Blower unit
- **HM5601** 3M™ Standard Capacity Battery – Versaflo™ 600
- **HM5602** 3M™ Easy Clean Belt – Versaflo™ 600
- **HM5603** 3M™ Airflow Indicator – Versaflo™ 600
- **HM5604** 3M™ Multi-Contaminant Filter – Versaflo™ 600
- **HM5611** 3M™ Cover for Multi-Contaminant Filter – Versaflo™ 600
- **HM5811** 3M™ Breathing Tube Assembly – Versaflo™ 600
- **HM5812** 3M™ Hood – Versaflo™ 600

PERSONAL PROTECTION

ADDITIONAL RESPIRATORS

3M™ Air-Mate™ PAPR System *HM5700*

A larger version of the Breathe Easy™, the Air-Mate™ provides exceptional comfort and mobility, though the Air-Mate limits its protection to particulates only (no chemical protection). The Air-Mate features an all-in-one design that provides both comfort and safety and is a lightweight, easy-to-use solution for respiratory protection where particulate contaminants exist. Constant flow of air provides cooling for the worker, resulting in greater comfort for the wearer. Loose-fitting headgear options provide respiratory protection without the need for a tight faceseal or fit testing. Battery-powered blower pulls the air through the filter resulting in no additional breathing resistance to the wearer. Its filter and battery are enclosed in a single unit, and the battery can be charged either within the unit or externally, using the external battery charger. Up to eight hours of battery service per charge. Battery charger sold separately.

Kit Includes:

- Blower unit and belt assembly
- *HM5703* 3M™ Breathing Tube Assembly – Air-Mate™
- *HM5715* 3M™ Replacement NiCd Rechargeable Battery
- *HM5720* 3M™ HEPA Filter Cartridge – Air-Mate™
- *HM5730* 3M™ Replacement PAPR Head Covers – Air-Mate™

3M™ Aura™ Health Care Particulate Respirator and Surgical Mask 1870+, N95 *HM5210*

This health care N95 particulate respirator and surgical mask has comfortable inner materials and helps provide respiratory protection against certain airborne particles. The individually packaged flat fold design allows for convenient storage prior to use. NIOSH Approved N95. FDA Cleared for use as a surgical mask. Fluid resistant and disposable. Embossed top panel helps reduce eyewear fogging. Sculpted top panel allows more room for eyewear. Innovative chin tab for ease of positioning, donning, adjustment. Box of 20.

Honeywell ONE-Fit N95 Respirator *HM5212*

Ideal for infectious agents and particulate hazards, these flat-fold respirators fit a wide range of face sizes and shapes. This mask meets NIOSH and CDC Standards for N95 protection against airborne pathogens and M.tuberculosis. Latex free. Box of 20.

North® RU6500 Air Purifying Respirator (APR) Kit *HM5410*

North RU6500 full face respirator mask with multi-purpose cartridges for respiratory protection against a variety of hazardous gases and vapors. Includes full-face mask and two North Defender Multi Purpose Respirator Cartridges (HM5412). Available in sizes S, M and L.

HM5411 North® RU6500 Silicone Full Facepiece (facepiece only)

Use with:

HM5412 North® Defender Multi Purpose Respirator Cartridge, 2 per box

HM5413 North® N-Series P100 Particulate Filter Cartridge, 2 per box

HM5414 Shower Cap for North® N-Series P100 Filter

Avon NH15 Combo™ Escape Hood *HM5461*

This single use, NIOSH approved escape hood provides 15 minutes of protection against carbon monoxide (CO) and CBRN. The escape hood goes on in 30 seconds or less and is super compact, weighing less than 1.5 lb. and measuring 6" x 5" x 4". It offers respiratory protection for escape from hazardous environments, particularly when dangerously high levels of CO or other toxic materials and gases are present. Available in sizes XS, Regular and L.

RESPIRATORY BATTERIES & CHARGERS

3M™ NiMH Rechargeable Battery - Breathe Easy™ HM5508

NiMH Rechargeable Battery for use with the 3M™ Breathe Easy™ PAPR.*

** 3M™ has discontinued the battery chargers for its Breathe Easy™ NiMH batteries. Only select this unit (HM5508) if you have existing battery charger(s).*

3M™ Lithium Non-Rechargeable Battery HM5509

Lithium Battery for use with the 3M™ Breathe Easy™ PAPR. Up to 12 hours of use.

3M™ Single Station Battery Charger - Versaflo™ 300 HM5801

Single bay battery charger for the Versaflo™ 300 Lithium Ion Battery.

3M™ 5-Unit Battery Charger - Air-Mate™ HM5705

Charges 5 batteries in 8 hours. LEDs indicate status of each battery. Allows the battery to be charged outside of the PAPR Unit. Automatically switches over to trickle rate mode to prevent overcharging.

3M™ Single Station Battery Charger – Versaflo™ 600 HM5607

This single station battery charger is a single-bay charger for the 3M™ Standard Capacity Battery – Versaflo™ 600 (HM5601) or the 3M™ High Capacity Battery – Versaflo™ 600 (HM5606).

Battery not included

3M™ 4-Station Battery Charger - Versaflo™ 300 HM5804

This 4-Station Battery Charger for the Versaflo™ 300 respirator charges four Versaflo™ 300 Lithium Ion High Capacity batteries (HM5807) at one time.

3M™ High Capacity Rechargeable Battery – Versaflo™ 300 HM5807

This 3M Versaflo 300 PAPR high capacity Lithium Ion battery has a battery life of 8 to 12 hours. LED lights on the battery indicate its charge status, both on and off the charger - great for quick identification in emergency situations. Charging time: less than 3.5 hours. For use with the 4-Station Battery Charger (HM5804) or Single Station Battery Charger (HM5801).

3M™ High Capacity Battery – Versaflo™ 600 HM5606

This 3M Versaflo 600 PAPR high capacity Lithium Ion battery has a battery life of 8 to 12 hours. LED lights on the battery indicate its charge status, both on and off the charger - great for quick identification in emergency situations. Charging time: less than 4 hours. For use with the 4-Station Battery Charger (HM5608) or Single Station Battery Charger (HM5607).

3M™ 4-Station Battery Charger – Versaflo™ 600 HM5608

This 4-Station Battery Charger for the Versaflo™ 600 respirator charges any combination of four Lithium Ion Standard Capacity batteries (HM5601) or High Capacity batteries (HM5606) at one time.

PERSONAL PROTECTION

RESPIRATORY FILTERS

3M™ HE Filter Versaflo™ 600 HM5605

High Efficiency (HEPA) filter for the Versaflo™ 600 PAPR respirator.

3M™ HE PA Filter Cartridge - Breathe Easy™ HM5507

High Efficiency (HEPA) filter for the Breathe Easy™ PAPR (HM5500). Box of 12.

3M™ CBRN Training Filter Cartridge HM5557

Training cartridges for the 3M™ Breathe Easy PAPR - CBRN (HM5550). Box of 6.

RESPIRATOR ACCESSORIES

3M™ Headcover – Versaflo™ PAPR HM5808

This headcover is a loose fitting facepiece approved for use with the 3M™ Versaflo™ 300 PAPR (HM5800) and 3M™ Versaflo™ 600 PAPR (HM5600). This headcover gives the user a wide field of vision and the unique shape allows easier use of a stethoscope. Available in sizes S and L.

3M™ Fit Test Kit HM5006

Test kits and accessories designed to help your organization meet OSHA fit testing requirements for respirators.

3M™ PAPR Decon Belt – Breathe Easy™ CBRN HM5558

This specialized decon belt is a part of the Breathe Easy™ PAPR CBRN System and is NIOSH approved for use by first responders, law enforcement, military and health care professionals who are preparing for needing protection from or responding to natural disasters or acts of terrorism. Fits waist sizes up to 60 inches. Made from PVC coated polyester webbing.

3M™ Decon Belt – Breathe Easy™ HM5505

This specialized vinyl decon belt is a part of the Breathe Easy™ PAPR System for use by health care professionals who are preparing for HazMat patient decontamination at their facilities. This belt is *not* NIOSH approved for the 3M™ Breathe Easy™ CBRN System. Fits waist sizes up to 50 inches.

3M™ Cover for HE Filter Versaflo™ 600 HM5612

Protective cover for the 3M™ HE Filter Versaflo™ 600 (HM5605).

RESPIRATORY CLEANING & STORAGE

3M™ Hood Insert for Breathe Easy™ PAPR - CBRN *HM5553*

Protective foam insert for improved storage of the 3M™ Butyl Rubber Hood of the 3M™ Breathe Easy™ PAPR System-CBRN (HM5550).

3M™ Battery Shower Cover - Breathe Easy™ *HM5554*

A water repellent battery cover for Breathe Easy™ PAPR batteries.

3M™ Shower Cover for PAPR Filter *HM5551*

Helps protect the 3M™ Breathe Easy™ PAPR filter canisters from moisture. For use with the 3M FR-57 Multi-Contaminant Filter Cartridge (HM5506) or the 3M RBE-57 CBRN Multi-Contaminant Filter Cartridge (HM5556). 2 covers.

3M™ PAPR & Breathing Tube Cover – Breathe Easy™ *HM5504*

This cover helps protect the PAPR blower unit and breathing tube used on the 3M™ Breathe Easy™ PAPR System.

Canvas Bag - 3M™ PAPR *HM5609*

Transport and store your 3M™ PAPR respirator and 3M™ accessories with ease with this canvas bag.

3M™ Versaflo™ 600 Cleaning and Storage Kit *HM5610*

These plugs and seals protect the Versaflo™ 600 PAPR (HM5600) blower unit during cleaning and storage.

3M™ Cleaning Wipes *HM5007*

Used to clean respirator facepieces and hood face shields. Individually packed 8" x10" towelettes are alcohol free and will not damage facepiece materials. Box of 100.

Looking for a 3M™ product not listed here?

No problem, DQE® is an authorized distributor of 3M™ respirators and accessories. Contact us and we will help you find what you need.

HOSPITAL INCIDENT COMMAND

DQE® Incident Solutions® products with Hospital Incident Command System (HICS) goals and strategies in mind to enhance hospital emergency preparedness and response capability.

HICS Vests - Complete Set IC1100

Identify team members and responsibilities easily using color coded vests with printed titles. These identification vests are constructed of a proprietary, nonwoven, breathable synthetic material, making them durable enough for repeat use, but economical enough to dispose of. All vests have easy to fasten side straps and a convenient front pocket. Vests come packaged by section and the set is contained in a black canvas tote bag.

Each HICS Vests - Complete Set Contains:

- 93 vests
- 1 vest for each of the Hospital Incident Management Team (HIMT) titles
- 19 blank vests that you can write on for event-specific identification
- Vests are packaged by section

17 Position HIMT Vest Set IC1101

Contains 29 vests: 1 vest for 8 HIMT Command and General Staff titles, 4 vests for Medical/Technical titles, 8 additional titles for key sections roles and 9 blank vests with assorted color trim.

Command and General Staff IC1110

Contains 16 vests: 1 vest for 8 HIMT Command and General Staff titles, 4 vests for Medical/Technical titles, and 4 blank vests.

Operations Section IC1120

Contains 47 vests: 1 vest for each of the 37 HIMT Operations Section titles and 10 blank vests.

Planning Section IC1130

Contains 11 vests: 1 vest for each of the 9 HIMT Planning Section titles and 2 blank vests.

Logistics Section IC1140

Contains 13 vests: 1 vest for each of the 11 HIMT Logistics Section titles and 2 blank vests.

Finance/Administration Section IC1150

Contains 6 vests: 1 vest for each of the 5 HIMT Finance/Administration and 1 blank vest.

Emergency Department Vests IC1200

Contains 17 vests: 1 vest for each of the 13 HIMT Operations Section titles most commonly used in the emergency department and 4 blank vests.

Cool Packs RP606

Keep cool packs on hand for prolonged cooling in the zipper front cooling vests, concealable cooling vests, and Decon Team cooling vests. See page 15.

Hospital Staff ID Vests IC1300

During disaster-prone events, it is critical to identify staff resources in order to maximize utilization, efficiency, and security. Hospital Staff ID Vests reduce confusion during these events by clearly identifying the staff and the roles they play. Contains 58 vests: (4) Doctor, (8) Nurse, (4) Transport, (4) Volunteer, (2) Lab, (4) X-Ray, (2) Social Service, (4) Admissions, (2) Admin, (6) Security, (2) Respiratory Therapy, (2) Housekeeping, (4) Triage, (10) blank vests.

Decon Team Disposable Vests IC1400

Decon vests identify the roles during a decontamination operation. Contains 17 vests: (1) Decon Unit Leader, (4) Decon Operations, (4) Decon Suit Support, (4) Decon Equipment Support, (4) Decon Security.

Decon Team Cooling Vests

These vests are functional within ICS and provide decon team-specific identification as well as optional cooling comfort for those in, or out of, protective suits. See page 15.

- RP61012** Decon Team Cooling Vest - 12 pack
- RP6105** Decon Team Cooling Vest - 5 pack
- RP6101** Blank Single

Additional Vest Labels Sold Separately:

- RP610L1** Decon Team Leader
- RP610L2** Operations Team
- RP610L3** Suit Support
- RP610L4** Equipment Support
- RP610L5** Security

HICS Command Toolbox™ IC2000

The HICS Command Toolbox eliminates the need to spend time gathering together supplies for your Hospital Command Center (HCC). Having charts, forms, vests, and more all in one place makes your HCC organized and easy to quickly manage. One water-resistant, corrugated plastic toolbox contains all the supplies you need to activate a HCC.

Each HICS Command Center Toolbox Contains:

- HICS 67 Position HIMT Chart - Dry Erase Board
- Easel
- Command & General Staff ID Vest Set
- HICS Forms (3 sets)
- HICS Job Action Sheets (3 sets)
- HICS Pocket Guide (5)
- Section Table Tents (2 sets)
- Dry Erase Marker & Eraser
- Clipboards (9)
- Notepads (5)
- Pens (12)
- Safety Seals (5)

HICS Hospital Incident Management Team (HIMT) Charts

Organizational charts that clearly display HIMT positions to identify team members. Can be hung on a wall or displayed on an easel. Dry Erase Board customization is available.

- IC2001** HICS 67 Position HIMT Chart - Dry Erase
- IC2005** Easel
- IC2006** HICS 26 Position HIMT Chart - Easel Pad, 20 sheets
- IC2007** HICS 26 Position HIMT Chart - Dry Erase
- IC2008** HICS 17 Position HIMT Chart - Dry Erase

HICS Forms IC2002

Individually wrapped sets of all 21 HICS Forms.

HICS Job Action Sheets IC2003

Individually wrapped sets of all HICS Job Action Sheets.

HICS Pocket Guides IC2004

Spiral bound HICS pocket guide made of water and tear resistant Teslin® paper. Provides command staff with a template of all positions in the HICS hierarchy and a mission statement for each.

DQE HEALTHCARE TRAINING & CONSULTING SPOTLIGHT

Hospital Incident Command:

DQE helps hospitals implement HICS in a cost-effective and efficient manner. The complete HICS program consists of various offerings ranging from initial to advanced training, executive leadership instruction, and hospital command center training to online education as well as customized exercises. With proper HICS training and preparedness, chaos during an incident is minimized, normal operations resume sooner, the cost of the event is monitored, safety is maximized, and there is more efficient use of personnel.

DQE Offers:

- HICS for Healthcare Managers
- HICS for Executive Leadership
- HICS Review Training
- Online HICS Training
- Applied HICS for Command & General Staff
- HICS for Critical Access Hospitals

HEALTHCARE EVACUATION

Prioritizing patients for movement, establishing movement teams, and communicating evacuation status become difficult processes to implement without prior standardization. DQE's line of evacuation products gives you the proper tools to help eliminate unknowns and limit liability.

Patient Evacuation Toolbox™ IC3000

The PACE (Patient Assessment & Command Essentials) Evacuation Toolbox contains supplies such as Evacuation Group Vests, Patient Evacuation Go-Pouches, Patient Information & Tracking Forms, Healthcare Evacuation Reference Guides, Wristbands, and more. Constructed from the best practices of emergency management evacuation procedures, this toolbox supports the Joint Commission standards for enhancing patient communication and is aligned with the Hospital Incident Command System (HICS).

Package Contains:

Patient Preparation Supplies

- Patient Evacuation Go-Pouch™ (25)
- Patient Information & Tracking Forms (2 sets of 25)
- Evacuation Door Sign (25)

Incident Management Supplies

- Healthcare Evacuation Reference Guides (10)
- HICS Vests – Evacuation Group (11)
- Job Action Sheets – Evacuation Group (1 set)

Support Supplies

- Caution Tape (300' roll)
- Clipboards (6)
- Duct Tape (1 roll)
- Equipment Tracking Labels (2 sheets)
- Glow Light Sticks – Green (25)
- Pens (12)
- Permanent Markers (2)
- Safety Seals (5)
- Wax Pencils (4)

View the PACE Evacuation Toolbox Video at www.dqeready.com/PACE.

DQE HEALTHCARE TRAINING & CONSULTING SPOTLIGHT

Hospital Evacuation:

Hospital Evacuation is a multi-faceted process that involves more than simply moving patients from Point A to Point B. It requires a coordination of patients, personnel, movement teams, and outside resources as well as the efficient use of patient assessment tools, documentation forms, and mobility equipment. A successful evacuation capability must be built upon an incident management foundation that is well understood and is easily scalable.

DQE Offers:

- Hospital Evacuation for Healthcare Managers
- Hospital Evacuation Planning
- Evacuation Skill Competency Training
- Hospital Patient Evacuation Drill
- Online Evacuation Training
- What's Next Evacuation Sustainment Program

Patient Evacuation Go-Pouch™ IC3004

The Patient Evacuation Go-Pouch is used by staff to assess and prepare patients for evacuation. It contains and secures vital patient information, medication, and supplies. During transport for evacuation, the Go-Pouch can be tethered to the patient so it does not become separated from the patient. It includes mobility-level wristbands to aid triage and resource allocation decisions, and door signage to communicate patient mobility status.

Patient Assessment Door Sign IC3003

Used to communicate the mobility level of a patient and that patient assessment for the room is complete. Vinyl signs are removable without leaving sticky residue on surfaces. Pack of 25.

Patient Mobility Level Wristbands IC3007

Pack of 25 sets. Patient wristbands for the following mobility levels:

- Walking
- Wheelchair
- Stretcher
- Discharged Wheelchair
- Discharged Stretcher
- Observation Needed

Patient Information & Tracking Forms IC3005

Records vital patient information from initial assessment to the point of departure. Includes critical patient care information such as allergies, primary diagnosis and relevant co-morbidities, and level of consciousness, as well as transportation information such as means of transport, accepting facility, and last actions prior to departure. The top copy of the form leaves with the patient and the bottom copy remains for medical records. Pack of 25.

HICS Vests - Evacuation Group IC3050

These HICS style vests identify evacuation incident management positions for a particular unit/department.

Vest Titles:

- Evacuation Group Supervisor (1)
- Horizontal Movement Team Leader (2)
- Patient Holding Team Leader (3)
- Blank vests to write on for customized position identification (5)

Evacuation Door Signs IC3002

The Evacuation Door Sign is used to indicate that a room has been inspected and cleared of patients. It allows you to quickly scan an area and tell which rooms have and have not been fully evacuated. Remove the backing and place on the outside of the patient's door after the room has been cleared and inspected. Pack of 30.

Healthcare Evacuation Reference Guides IC3008

This pocket-sized reference guide reviews healthcare evacuation procedures and incident management roles and responsibilities. The tri-fold guide has evacuation procedures on front and roles and responsibilities on the back. Use as a training tool to sustain evacuation skills or hand them out to staff during an event. Pack of 10.

Job Action Sheets - Evacuation Group

Distribute to staff assigned to movement teams, holding areas, and floor-level incident management. These proprietary Job Action Sheets contain the job expectations for each Evacuation Group position: Evacuation Group Supervisor (1), Horizontal Movement Unit/Team Leader (2), Patient Holding Unit/Team Leader (3).

(Included in PACE Evacuation Toolbox. Not available for individual sale).

Glow Light Sticks RP4710

These green light sticks glow for several hours, providing a light source for many different situations. They can be used to mark an exit path, track patients, identify staff, and more. An attached hook allows for hanging from clothing, equipment, etc. Box of 25.

RESPONSE SUPPORT

General products to support hospital emergency preparedness.

Wobble Light *RP4601*

Bright, convenient, and virtually indestructible; the 36" tall Wobble Light® is a highly durable work light that takes a severe beating and keeps on performing. Shock absorber protects bulb from strikes and jarring. Internal ventilation system keeps light cool enough to touch.

Specifications:

- 18" W x 36"H
- Requires a standard 110-volt power source
- String together in a series or use individually
- 175-watt Metal Halide, 20,000 lumens
- Illumination range: 32-42' diameter
- Weight: 27 lb

LED Work Light *RP4650*

The LED Work Light can hang either horizontally or vertically to light emergency preparedness work areas such as Mobile Command Shelters. These bright and durable with LED tube lights are rated up to 50,000 hours and have reflective tube shields for focused task lighting. The light comes with 2" integrated rotating hook and 2 separate hooks for horizontal hanging and a 25' cord. 120 Volt/ 60 Hz. 900 Lumens, 10 Watt.

Glow Light Sticks - Green *RP4710*

These green light sticks glow for 8-12 hours, providing a light source for many different situations. An attached hook allows for hanging from clothing, equipment, etc. To activate the glow stick, simply snap and shake it. Box of 25.

DQE HEALTHCARE TRAINING & CONSULTING SPOTLIGHT

CBRNE & In-Hospital HazMat Spill Training:

Train personnel to identify and execute the appropriate response to all spills. In some cases, initiating an emergency response will include calling an outside response agency (community HazMat team). For small, incidental spills, DQE will train your staff how to manage the containment, cleanup, and disposal safely and effectively in compliance with OSHA regulations.

CBRNE & In-Hospital Spill Training Covers:

- The proper selection and use of personal protective equipment
- Hazardous materials recognition, identification, and response
- Spill cleanup training that includes instruction on the use of spill kits
- Chemical Spill & Release Response Policy development

Luminite Inflatable Light Tower

The Luminite Inflatable Light Tower sets up in seconds and provides portable light for numerous applications, such as lighting for hazardous material spill sites, emergency rescues, field hospitals or emergency shelters. The tower takes seconds to inflate and achieves full illumination in under 3 minutes. The 875 Watt Metal Halide bulb lights an area the size of a football field with 360 degrees of ambient light.

- RP4521** 15' Light Tower - Red Case
- RP4522** 15' Light Tower - Yellow Case
- RP4524** 15' Light Tower - White Case
- RP4531** 7' Light Tower - Red Case
- RP4532** 7' Light Tower - Yellow Case
- RP4534** 7' Light Tower - White Case

Specifications:

- 875-watt Metal Halide bulb provides hours of illumination
- Requires a standard power supply or generator, and draws only 8.5 amps
- Weight: 75 lb
- Stands up to 43 mph winds with included guy lines
- Cools down in 3 - 5 minutes for storage
- Stores compactly inside 2' x 17" x 2' hard-shell casing that is made with fire retardant injection molded fiberglass.

875W Metal Halide Bulb **RP4541**

875W Metal Halide Bulb to replace the Metal Halide Bulb in the 15' Luminite Inflatable Light Tower (RP4521) or 7' Luminite Light Tower (RP4531).

Luminite Sign Banner

Luminite Sign Banners snugly fit around the Luminite 15' Inflatable Light Tower (RP4521) or Luminite 7' Inflatable Light Tower (RP4531) to provide illuminated signage. These customized removable bands act as a marker or rallying point for Command Posts, Police, Rehab, Triage, Hot Zone, or Decon Areas. **Custom banners are available, contact us for details.**

- RP4545** Luminite Sign Banner - Police
- RP4546** Luminite Sign Banner - Command Post
- RP4547** Luminite Sign Banner - Rehab
- RP4548** Luminite Sign Banner - Triage
- RP4549** Luminite Sign Banner - Hot Zone
- RP4550** Luminite Sign Banner - Decon Area
- RP4551** Luminite Sign Banner - Custom

Specifications:

- Weather-resistant vinyl
- Attaches with Velcro around the Luminite Inflatable Light Tower

RESPONSE SUPPORT

HazMat Smart Strip™ HM420

Arm yourself with information with the HazMat Smart Strip. Identifies eight classes of chemicals and uses a simple color-code system. The HazMat Smart Strip is equipped with a peel-and-stick backing or can be clipped to the responders clothing ensemble. The reagent strip produces a visible color change when exposed to a chemical from the corresponding category. The eight reagents are self-contained and activated by removing the protective covering that preserves the indicator layer until ready for use. No additional buffers or reagents are required. Sold individually.

Reagent	Paper Color	Positive Indication	Sensitivity Level
Chlorine	yellow/peach	blue/white/blue halo	1 ppm
pH	orange	red/blue	above or below neutral
Fluoride	pink	yellow/white	20 ppm
Nerve	tan	gold/red/green	in contact with G,H,V agents
Oxidizers	white	blue/violet	1 ppm
Arsenic	white	yellow/brown/black	0.5 ppb
Hydrogen Sulfide	white	brown/black	5 ppm
Cyanide	green	blue	0.2 ppm

Spill Kit - 5 Gallon HMS1400B

Complete 5 gallon kit that quickly contains incidental chemical spills.

Kit Includes:

- 5-gallon bucket w/screw lid
- Hazardous waste label
- Absorbent socks (2) - 3.25" x 42"
- Putty sticks (2)
- Absorbent pads (6)
- Absorbent pillows (2)
- Pair of nitrile gloves
- Non-vented goggles

Disposable Cooling Vest Starter Set **RP6214**

Disposable Cooling Vests are adjustable and thin for comfort under personal protective apparel and chemical suits. The cool packs remain 59°F for up to 2½ hours. They are designed to target the optimal upper torso cooling zone across a wide range of body styles. Vests may last multiple sessions depending on soiling and activity level. Starter set includes (5) Disposable Cooling Vests (RP6213) and (1) set of reusable Cool Packs (RP6214).

RP6212 Disposable Cooling Vests – Replacement Pack (10 vests)

RP6213 Disposable Cooling Vests – Cool Packs (set of 4)

RP6213

RP6214

PhaseCore® XPC Cooling Vest Set

These cooling vests provide a personal cooling system that is both comfortable and lightweight.

RP6311B PhaseCore® XPC Cooling Vest Set - Black

RP6311W PhaseCore® XPC Cooling Vest Set - White

Kit Includes:

- XPC Cooling Vests (4)
- PhaseCore® 28 Cooling Elements (21 per vest)
- Small extenders (2 per vest)
- Large extenders (2 per vest)
- Insulated canvas transport bag with shoulder strap and handle
- Reusable ice packs (5)
- User instructions

Cooling Vests

Keep cool while working with cooling vests. The vests have over the shoulder and side strap adjustability, maintain a cool, constant 59°F temperature for up to 2.5 hours, weigh less than 5 lb, and cool packs recharge in minutes in ice water. Includes one cool pack set.

RP6210 Concealable

RP6211 Zipper Front

RP606 Replacement Cool Packs (box of 4)

RP6210

RP6211

PhaseCore® XPC Cooling Vest

Prevent heat stress with comfort using a low profile, heat activated cooling vest. Allows users to increase productivity while reducing heat injuries by supplying gentle and safe body cooling.

RP6310B PhaseCore® XPC Cooling Vest - Black

RP6310W PhaseCore® XPC Cooling Vest - White

MASCACHE® MEDICAL SURGE CARE PRODUCTS

MasCache® helps healthcare providers streamline care during emergencies that require expanded treatment capacity. These products are essential, disposable supplies for patients and staff. They are conveniently packaged to help hospitals and emergency teams quickly create temporary treatment areas and deliver disaster care.

MasCache® products were developed using recommendations made by government agencies, independent expert panels, and our own research. This effort helped us identify the type and number of items that need to be stored, the best way to group them based on need and function, and how to package them for quick and easy deployment.

The MasCache® line contains prepackaged patient care kits, linen & bedding kits, staff scrubs, and protective clothing. Additional items like privacy curtains, IV poles, disposable stethoscopes, and more are also included so that the rapid deployment of temporary patient care areas doesn't become a confusing scramble for randomly located supplies.

POD

PODs are groupings of MasCache® surge care products that are designed to be stationed and dispensed at bedside.

MOD

MODs are mobile disposable storage cabinets filled with essential supplies. Each cabinet can be easily rolled and positioned as needed.

Guidance from hospital accreditation organizations states that planning should focus on at least 96 hours of hospital self-reliance before regional, state, or federal resources are able to support local needs. Both the MasCache® POD and MOD are organized to assist your hospital in meeting these standards of care.

The MasCache® kits that fill the dispenser boxes of both the POD and MOD were selected, assembled, and packaged based on their quality, functionality, disposability, and longevity.

LONG-TERM STORAGE PACKAGING

PODs and MODs are packaged in a multi-layer, weather resistant system that protects sensitive items from moisture, sunlight, ozone, and impact. They are clearly marked with detailed content lists, delivery dates, and storage recommendations. Products included in both PODs and MODs have no published expiration date and have demonstrated shelf life stability.

MasCache® Contents *(see pages 43-49 for product details)*

- | | | |
|--------------------------------|------------------------------|--------------------------------------|
| • Absorbent Adult Briefs | • Gown Kits | • Pillows |
| • Baby Diapers | • Hygiene Kits | • Post Mortem Kits |
| • Bedding & Linen Kits | • Infant Care Kits | • Privacy Curtains |

| • Blood Pressure Cuff Covers | • Emergency Warming Blankets | • StatPac™ Standard Precautions Kits |
| • Dry-it™ Disposable Towels | • N95 Respirators | • Stethoscopes |
| • Nitrile Exam Gloves | • Patient Lifters | |

Contents vary between Adult & Pediatric POD & MOD configurations.

THE CONVENIENCE OF *POD*-ULARITY.

MasCache® PODs are conveniently grouped and packaged in predetermined quantities to provide supplies for 25 patients for 96 hours of care. DQE offers three standard PODs – one for adult patients, one for pediatric patients, and one combination POD for both adult and pediatric patients. All POD contents can be purchased by the box to help you either create your own POD or enhance an existing supply.

The basis of the POD is the “outer shell,” which allows you to mix and match component boxes to ensure proper supplies are arranged by use, location, or preference. The dispenser boxes can be replaced as needed by sliding them in and out of the outer shell.

The POD provides the flexibility to organize treatment areas with ease and speed. The outer shell is the typical height of a bedside table, which gives staff much needed functional work and storage space.

MasCache® PODs

MCP0D4 Adult POD - 96 hour

MCP0D5 Pediatric POD - 96 hour

MCP0D6 Combination POD - 96 hour

(Each 96 hour POD is contained on 3 pallets)

For additional information on POD contents, quantities, and material specifications, visit www.dqeready.com/mascache.

From the POD delivery...

PODs are delivered on pallets sealed for years of weather resistant, long-term storage.

To the shell...

The POD outer shell keeps stacked boxes stable, allowing for a variety of combinations of supplies and providing functional storage space.

To the dispenser box...

Clearly marked and color coded dispenser box packaging makes supply identification a breeze.

To the ready to use kit...

The individual kits that fill the dispenser boxes are color coded with bilingual content lists.

Linen Kit MC4001

Bottom sheet, draw sheet, absorbent pads (2), top sheet, pillow case. Box of 25 kits.

**Youth Gown Kit MC4004**

Patient gown (2), 2 socks. Box of 25 kits.

**Infant Linen Kit MC4002**

Crib sheet, baby blanket, drawsheet. Box of 25 kits.

**Hygiene Kit MC4005**

Tooth care swabs (4), hair brush, wipes (8), drying towels (2). Box of 25 kits.

**Patient Gown Kit MC4003**

Patient gowns (2), socks. Box of 25 kits.

**Infant Care Kit MC4006**

Baby wipes (4), diapers (2), gown, absorbent pads (2), drying towels (2). Box of 25 kits.

**Staff Scrubs MC4007**

Shirt, pants. Box of 25 sets. Available in sizes M, XL and 3XL.

MASS CARE

THE MOBILITY OF *MOD*-ULARITY.

Each MasCache® MOD includes two MOD storage cabinets that contain enough supplies for 25 patients for 48 hours of care. MODs are available in two standard configurations - one for adult patients and one for pediatric patients. Mix or match two adult and/or pediatric MODs to meet your 96 hour requirements. MOD supplies are also available separately, so you can refill your MOD as needed.

Two MOD disposable storage cabinets are shipped together on one pallet sized base - making it the smallest footprint for patient surge care on the market.

The MOD is ready to use at a moment's notice. Simply unwrap the weather resistant outer plastic seal, remove the blocks around the wheels, and it's ready to go.

The MOD is easily rolled and positioned wherever supplies are required.

MasCache® MODs

MCMOD7 Adult MOD - 48 hour

MCP0D8 Pediatric MOD - 48 hour

(Each 48 hour MOD is contained on 1 pallet)

For additional information on MOD contents, quantities, and material specifications, visit www.dqeready.com/mascache.

Long-Term Storage

MODs are delivered on a cardboard base that is sealed for years of weather resistant, long-term storage. Wheels on the bottom of the cabinet allow for fast movement to any desired location.

Mobile Cabinets

Since MOD cabinets are on wheels, they can be moved by one person to strategic locations and can be adapted within any treatment area configuration.

Easy Dispensing

The MOD keeps all supplies in one place for easy access, so healthcare providers can go to a central location for surge care supplies.

48 Hour Bedding Kit - Adult MC5001

Bottom sheet (2), draw sheet, absorbent pads (6), top sheet (2), pillow case (2), inflatable pillows (2), polyester blanket, emergency warming blanket. Box of 15 kits.

48 Hour Bedding Kit - Infant MC5004

Crib sheet (2), draw sheet, absorbent pads (6), baby blanket. Box of 15 kits.

48 Hour Patient Care Kit - Adult MC5002

Adult patient gown (3), socks, tooth care swabs (12), hair brush, body wipes (8), Dry-it™ Towels (2). Box of 15 kits.

48 Hour Patient Care Kit - Youth MC5003

Youth patient gown (3), youth socks, tooth care swabs (12), hair brush, body wipes (8), Dry-it™ Towels (2). Box of 10 kits.

48 Hour Patient Care Kit - Infant MC5005

Baby gown (4), baby socks, baby wipes, diapers (8), Dry-it™ Towels (2). Box of 10 kits.

DQE HEALTHCARE TRAINING & CONSULTING SPOTLIGHT

Emergency Management Planning:

Disaster planning is a time consuming, arduous task to develop a comprehensive emergency management plan that is truly functional and regulatory compliant. Most hospitals recognize the need to update their plan as well as develop new event-specific plans, but don't have the necessary internal expertise, resources, time or budget to devote to such a project. DQE is committed to changing that status quo by bringing comprehensive emergency management planning within reach to all hospitals through a proven system that combines proprietary planning tools and consultative expertise to create a functional, living document that enhances readiness.

DQE Offers:

- Emergency Management Capabilities Assessment
- All-Hazards Emergency Management Planning
- Hospital Evacuation Planning
- Medical Surge and Alternative Care Site Planning
- Fatality Management Planning
- Home Health and Hospice Planning
- Severe Weather Events Planning
- Loss of Community Support Planning
- General Chemical Spill Planning
- Emergency Decon Operations Planning

MEDICAL SURGE SUPPLIES

DQE offers a wide variety of emergency medical supplies to enhance your medical surge or alternate care facility.

Pillows MC4008

Single patient use disposable pillows. 16" x 22". Box of 25.

Blankets MC4009

100% Polyester blankets. 40" x 80". Box of 25.

Emergency Warming Blankets MC4023

Mylar® warming blankets. Unfolded: 55" x 82"; folded: 3" x 5" x 1". Box of 25.

Patient Lifter MC4010

Four handles per side, one per end. 650 lb capacity. Box of 10.

Privacy Cube MC5022

Provide needed privacy space quickly and efficiently with the Privacy Cube. The Privacy Cube assembles to create a square-shaped area with a variety of emergency response uses. *See page 17.*

Dry-it™ Disposable Towels HM705

Roll of 100, 19" x 42" super absorbent, disposable towels. Sold individually. *See page 14.*

Blood Pressure Cuff Covers (not shown) MC4018

For use with a body bag. Contains 54" x 108" plastic shroud sheet, (3) 36" ties, (2) 60" ties, (3) ID tags, and (1) cellulose chin strap. Pack of 10.

Post-Mortem Kits

Necessary supplies for handling the deceased. Each kit contains 36" x 90" body bag, shroud kit, and absorbent pad. Box of 10 kits.

MC4020 Adult - 36" x 90" body bag

MC4021 Pediatric - 28" x 48" body bag

Urine/Emesis Bags MC4035

A convenience bag that works efficiently to contain urine or emesis (vomit). This inexpensive, compact, dual purpose device can be stockpiled to prepare for mass care events. Box of 40.

Bedpans MC4025

Graduated to 800 mL. 11 3/4" x 14 3/4" x 5". Box of 25.

Germicidal Disposable Wipes MC4011

For use on surfaces and equipment. EPA Reg. No. 9480-4. Meets CDC criteria for use against the Ebola virus. Box of 50.

Male Urinals MC4026

Graduated to 32 oz/1000 mL. Box of 25.

Baby Diapers MC4033

Side panel and cloth-like outer cover keep skin dry, while a polymer controls odor. No-tear tape surface allows refastening to reduce waste. Latex-free. Available in sizes 4 (160 per case) and 6 (120 per case).

**Pee-Wee® Unisex Urine Bag RH4001**

A safe, sanitary, convenient, biodegradable way to 'pee' when plumbing's not available. Includes a waste gelling/deodorizing agent inside the bag. Slip resistant unisex collar can be used by men or women. Snap-close bag with no spills and no contact. Gels 24 oz. of liquid waste. Biodegradable bag can be disposed of in normal trash. Box of 50.

**Adult Disposable Absorbent Briefs MC4027**

Fits 40" - 50" waist. Box of 80.

**Odor Eliminator MC4048**

Non-scented odor eliminator that combines with odor molecules to remove odors resulting from necrotic tissue, urine, or feces. 1fl. oz spray bottles, 48 per case.

**Bedside Commode MC4029**

Deluxe 4-in-1 steel unit easily converts for use as a stationary commode, raised toilet seat or a toilet safety frame. 10-quart capacity commode bucket with cover and splash shield is included. Box of 4.

**Sani-Bag+® Commode Liner**

The Sani-Bag® is a commode/bedpan liner that provides human bio-waste management by containing and gelling waste for easy, sanitary disposal without a need for water. The Sani-Bag+® Commode/Bedpan liner consists of a funnel shaped biodegradable bag that contains a specially formulated waste treatment powder. The powder turns liquid to solid for easy, mess-free disposal. It also has a deodorizer to control odor and a catalyst that aids in decomposition. After use, simply remove the bag, roll it over the seal, and dispose of it in the trash. The Sani-Bag helps reduce the risk of spreading infections, like c.diff.

MC4031 100 individually wrapped, 4 dispenser boxes of 25

MC4031-200 200 bulk pack, not individually wrapped

- Cholera Bed with IV Pole (MC4038IV) has an attachable 66" IV pole

PANDEMIC SCREENING

Products and packages for safely screening patients during the flu season.

Pandemic Screening Shelter Package

The Pandemic Screening Shelter Package contains the products needed to set up a temporary pandemic screening area outside of your hospital. By screening for the flu prior to entering the hospital, flu patients can be triaged and directed appropriately to keep staff and others patients safe, and reduce the spread of the flu.

MCK6000 Pandemic Screening Shelter Package

MCK6000H Pandemic Screening Shelter Package with Heater

Package Contains:

- 10' x 10' shelter with sidewalls (1)
- Shelter lights (3)
- Folding tables (2)
- Folding chairs (4)
- Biohazard bag holder with bags (1)
- Clock
- Check in/out sign
- Extension cord with 3-way tap

Pandemic Screening PPE Package **MCK6001**

The Pandemic Screening PPE Package contains the personal protective items needed to keep your staff safe when working with potential flu patients.

Package Contains:

- SafePac® Plus Blood and Virus Protection Suit Kits - L/XL HM5912 (2 boxes of 10 each)
- SafePac® Plus Blood and Virus Protection Suit Kits - 2X/3X HM5912 (2 boxes of 10 each)
- Nitrile exam gloves - S (5 boxes of 100 gloves)
- Nitrile exam gloves - L (5 boxes of 100 gloves)
- Blank white ID vests (6)

Pandemic Screening Total Solution **MCK6005**

The Pandemic Total Solution Package combines the Pandemic Screening Shelter with Heater Package (MCK6000H) and the Pandemic Screening PPE Package (MCK6001) for thorough pandemic preparedness.

DISCOVER DQE-ON-DEMAND[®] ELEARNING

DQE-On-Demand[®] is a subscription-based, online training program that uses professionally produced animation to teach procedures and demonstrate skills clearly and effectively. Created in response to hospital requests for more efficient and affordable training, DQE-On-Demand is a scalable solution that provides 24-hour access for ultimate flexibility. With a full range of materials developed by national medical and preparedness experts, DQE-On-Demand is the most comprehensive and effective eLearning program available today.

HOW DQE-ON-DEMAND[®] WORKS FOR YOU

LEARN SKILLS THROUGH COMPREHENSIVE CURRICULUM

Available programs include: Decontamination, HICS, and Evacuation. All containing the latest hospital emergency preparedness best practices, skills, and techniques.

TRAIN STAFF AT THEIR OWN PACE ON A VARIETY OF DEVICES

Programs are broken down into small 15-30 minute courses, so staff can view them at any time, with 24-hour online access. With DQE-On-Demand now available on mobile devices, there are even more ways to learn.

TRACK LEARNING PROGRESS

Track the training progress of individual staff or entire hospitals through custom, exportable reports.

EASILY COMMUNICATE TRAINING GOALS

As a Program Administrator, you can post bulletins for staff to communicate facility-specific information.

INFORMATION AT YOUR FINGERTIPS

Staff is kept current through relevant news feeds and an extensive library of downloads and reference manuals. Use the Upload Zone to store documents related to your facility's Emergency Management program.

EXPAND ACCESS WITH SCALABLE OPTIONS

Whether you need to train a dozen individuals or a dozen hospitals, accounts can be easily added and managed. Flexible, affordable subscription options allow you to choose the training that fits your needs and budget.

DQE-ON-DEMAND® ELEARNING FOR HEALTHCARE EMERGENCY PREPAREDNESS

can help you achieve your staff training goals in a simple, engaging way. Join the thousands of healthcare personnel that are using DQE-On-Demand for their emergency preparedness training and sustainment needs.

ELEARNING DESIGNED EXCLUSIVELY FOR HOSPITAL EMERGENCY MANAGEMENT

SINGLE HOSPITAL & REGIONAL PROGRAM ADMINISTRATORS

- Easily add staff to DQE-On-Demand with bulk upload tools. Enter their name and email, students finish the rest of the sign up process themselves.
- Don't worry about your seats expiring before you've had a chance to use them. Seats don't begin their one year expiration until the student has begun the learning process.
- Send and receive key communications to staff and other Program Administrators through the bulletin board and emails.
- Access the expanding library of articles, videos and manuals related to emergency management.
- Use the Upload Zone to store planning and training documents related to your Emergency Management team.
- Monitor progress of students and download customizable reports.

INDIVIDUAL STUDENTS

- Learn Decontamination, Hospital Incident Command, and Evacuation skills at your own pace through short animated courses.
- Take online exams to evaluate comprehension of key concepts.
- Supplement learning with an expanding library of articles, videos and manuals related to emergency management.
- Receive key communications from DQE-On-Demand Program Administrators.
- Track your progress & download and print reports to track completion.
- Revisit courses, as needed, to keep your skills fresh.

DQE INFORMATION AND POLICIES

DQE MANUFACTURING WARRANTY

Products manufactured by DQE carry a lifetime warranty against manufacturing and material defects. In addition, DQE offers one free replacement part over the life of any shower we manufacture (part code from product insert required). Warranties for products manufactured by companies other than DQE are subject to the limits and restrictions listed by the respective manufacturer. Contact DQE for details on specific manufacturer warranties. DQE reserves the right to deny warranty coverage if product has been mishandled or abused. DQE reserves the right to replace or repair a warranted product at its discretion.

ORDERS

All orders are subject to approval by DQE Inc., Indianapolis, IN. Orders will be acknowledged within 24 business hours of receipt and can be placed by mail, email, phone or fax with VISA/Mastercard/Discover/AMEX or purchase order.

PRICES

Prices are net and subject to change without notice. The pricing in effect on the date the order is received is the amount that will be charged.

RETURNS

All returns must be authorized by DQE Customer Service. After 30 days from sale, merchandise approved for return will be eligible for DQE credit only and a restocking charge of 10% will be deducted from the final credit. The customer is responsible for all shipping charges on returned merchandise after 30 days from sale.

SHIPPING

There is no minimum size. All orders ship FOB shipping point. Shipping and insurance charges are paid by the customer. We cannot deliver to a PO, APO or FPO address.

FREE SHIPPING POLICY

Free shipping is provided on most orders \$10,000 and above within the continental U.S. DQE reserves the right to assess shipping charges for any special or unforeseen circumstances. Free shipping exclusions are as follows:

- Distributors with contract pricing and other existing rebate offers
- Luminite Light Tower(s) (RP4521, RP4522, RP4524, RP4524, RP4531, RP4532, RP4534)
- All overpack container products and collection barrels (HMS1720-HMS1795, HM450)
- Customized product orders
- Accessorial shipping services are not included

PAYMENT TERMS

Payment on purchase orders is due within 30 days of order. Payments after 30 days will be assessed a fee of 1.5% per month on the balance.

TAXES

Sales or other taxes are added to invoice as required. Tax exempt customers must include proof of sales tax exemption with order.

CANCELLATIONS

Cancellations can be made if an order is open; product material has not been committed to at the factory or with a vendor; and the product is not in an active shipping status or closed.

PPE RETURN POLICY

Due to the hazardous nature of using personal protective equipment, PPE products are not eligible for return.

MASS CARE RETURN POLICY

DQE is unable to accept returns or exchanges on Mass Care products, which are designated by "MC" at the beginning of the product number. Contact DQE for product samples prior to purchase.

THE DQE GUARANTEE

DQE guarantees satisfaction for every product it sells. If you are not completely satisfied with any product (custom orders excluded) purchased from DQE, return it for a full credit (some exclusions may apply).

Products manufactured by DQE carry a lifetime warranty against manufacturing and material defects. In addition, DQE offers one free replacement part over the life of any shower we manufacture (with part code from shower instruction sheet). Warranties for products manufactured by companies other than DQE are subject to the limits and restrictions listed by the respective manufacturer. DQE reserves the right to deny warranty coverage if product has been mishandled or abused. DQE reserves the right to replace or repair a warranted product at its discretion.
