

EM212: HICS ACTIVATION & COMMAND

This course describes the process for determining when a hospital's ICS-based Emergency Operations Plan (EOP) should be activated. It also covers some of the immediate Command functions that will be performed upon activation of the EOP.

SLIDE 1

Introduction

SLIDE 2

Emergency Operations Plan (EOP) Activation

SLIDE 3

Incident Recognition

SLIDE 4

Inefficient Plans from the Past

SLIDE 5

Optimal EOP

SLIDE 6
NIMS Incident Types

SLIDE 7
NIMS Incident Types 5 and 4

SLIDE 8
NIMS Incident Types 3, 2 and 1

SLIDE 9
Levels of EOP Activation

SLIDE 10
Examples of EOP Activation Levels

SLIDE 11
Disruption of Normal Duties

SLIDE 12
Criteria for Activating the Plan

SLIDE 13
Understanding of Expectations

SLIDE 14
Authority for EOP Activation

SLIDE 15
Delegate Authority

SLIDE 16

Initiate and Activate EOP

SLIDE 17

Assignment of an Incident Commander

SLIDE 18

Incident Command Post and Emergency Operations Center

SLIDE 19

Hospital Command Center

SLIDE 20

Qualifications of the Hospital Command Center

SLIDE 21

Activation of HICS Positions

SLIDE 22

Example Scenario - Alert

SLIDE 23

Example Scenario - Medical Care Branch Director

SLIDE 24

Example Scenario - Four Major Trauma Patients

SLIDE 25

Example Scenario - New Positions Activated

SLIDE 26

Example Scenario - De-Escalate ICS

SLIDE 27

Transfer of Leadership

SLIDE 28

Conclusion
