

## **EV130: NON-EMERGENCY EVACUATION - OVERVIEW**

This course describes in detail the process of urgent and planned evacuation, and addresses the method for classifying patients based on their mobility level, patient preparation activities, and appropriate discharge procedures.

### **SLIDE 1**

Introduction

### **SLIDE 2**

Urgent Evacuation

### **SLIDE 3**

Planned Evacuation

### **SLIDE 4**

Non-Emergent Evacuation Planning Assumptions

### **SLIDE 5**

Pre-Evacuation Actions

**SLIDE 6**  
Incident Management Leadership

**SLIDE 7**  
Preparing for Evacuation

**SLIDE 8**  
Perimeter and Departure Staging Areas

**SLIDE 9**  
Loading Areas

**SLIDE 10**  
Bed and Medical Equipment Relocation

**SLIDE 11**  
Categorize Patients by Mobility

**SLIDE 12**  
Three Mobility Levels

**SLIDE 13**  
Determining a Patient's Mobility Level

**SLIDE 14**  
Mobility Level - Walking

**SLIDE 15**  
Mobility Level - Wheelchair

**SLIDE 16**

Mobility Level - Non-Ambulatory/Stretchers-Bound

**SLIDE 17**

Assign Patient Wristbands

**SLIDE 18**

Sub-Categories of Stretcher-Bound Patients

**SLIDE 19**

Designating Patients as "Special Observation Needed"

**SLIDE 20**

Designating Patients to be Discharged

**SLIDE 21**  
Patient Preparation

**SLIDE 22**  
Family and Visitors

**SLIDE 23**  
Prepare the Evacuation Go-Pouch

**SLIDE 24**  
Attach the Patient's Evacuation Go-Pouch

**SLIDE 25**  
Patient Discharge

**SLIDE 26**  
Conclusion
