

EV131: NON-EMERGENT EVACUATION—PROCESS

This course addresses the sequential process of moving patients during a non-emergent evacuation situation. It starts with defining movement teams, temporary patient care and staging areas, and designated incident managers. The course concludes with a review of the actual sequence of patient flow and elevator coordination procedures.

SLIDE 1

Introduction

SLIDE 2

Horizontal Movement Teams

SLIDE 3

Patient Holding Area

SLIDE 4

Vertical Movement Teams

SLIDE 5

Vertical Movement Teams – Non-Operational Elevators

SLIDE 6
Patient Loading Areas

SLIDE 7
Patient Movement Sequencing

SLIDE 8
Assign Evacuation Sequence

SLIDE 9
Movement of Specialty Care Patients

SLIDE 10
Elevator Control

SLIDE 11
Conclusion
